

Imperial Springs

Product Specifications

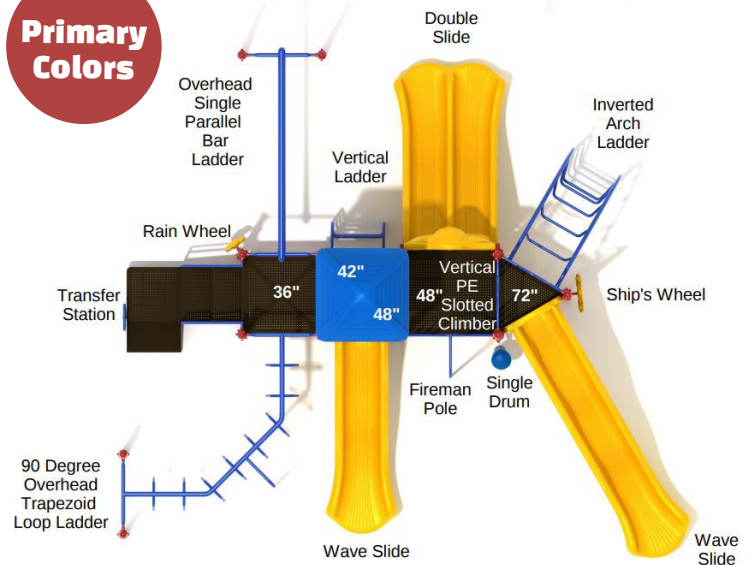

Model number: COMM-1IMPES
Child Capacity: 36 to 42 children
Age Range: 5 to 12 years
Safety Zone: 33' 7" x 32' 1"
Fall Height: 84"
Post Diameter: 3.5"

ADA Compliant 

Elevated: 9 components
Ground Level: 3 components

Primary Colors

Neutral Colors

MEETS NATIONAL STANDARDS FOR:

ASTM F1487-17

CPSC GUIDELINES #325

Product Description

With so much to see and do on this play structure children will be excited to explore every aspect of the Imperial Springs playground. The structure provides a real challenge for kids and stimulates their creativity as there are multiple ways to climb up to the upper platforms. If they enter the easy way by using the Transfer Station entrance they have two types of overhead ladders to choose from on each side. The first is an Overhead Single Parallel Bar Ladder which can be shuffled along with two hands but there's also the challenging 90-Degree Overhead Trapezoid Loop Ladder, dropping down when they reach the end. As they climb higher the fun factor escalates too with not one, not two, but three thrilling slides to enjoy. They can race with a friend down the Double Slide, or choose a thrilling bumpy ride down a small or large Wave Slide. There's an Inverted Arch Ladder and a Vertical Ladder to climb up too and a Fireman's Pole so they can get down again in style. There are lots of playful features around the bottom of the structure too, including a Rain Wheel and Single Drum to add sound effects to play time, and a Ship's Wheel for the captain to chart a course towards more adventure.
