1	AG943-400	Slide Handle (Hdwre & Instr)
1	AA917-603	Fireman's Pole (Hdwre & Instr)

The components of this gym can be combined with others to create different play sets. This is the best order of assembly to create this specific set. Read this sheet and all instructions included with the different parts before assembly.

See the Instructions and Owner's Manual included in carton 63067-202 for important safety information.

- Start by assembling the Ridgefield tower. Instructions are in carton 63067-202. Other instructions and hardware are in the cartons noted at left. Do not use the Williamsburg instructions packed in the wood roof carton.
- Ridgefield step 2. Do not install the Sandbox Center on the front of the tower. Use the Floor Transition from the Ridgefield Play Floor (63072-101). See page 2 of the Ridgefield Play Floor instructions. Secure the Sandbox backs but wait to install the floors.
- Ridgefield step 12. Install only the angle braces under the porch. The other braces will interfere with the bottom clubhouse panels.
- Ridgefield step 18. The 9ft Beam will be mounted in the position pictured above; parallel to the roof.
- Ridgefield step 32. Do not install safety rails.
- Install the 9ft Swing Beam. Instructions are in 63076-303.
- Wait to install the Access Ladder, Slide, and Wall Slats until after the rest of the play set is complete.

- Complete installation of the Ridgefield porch play floor (63072-101) followed by the Williamsburg play floor (SC908-800Q).
- Install the lower clubhouse panels as shown in the instructions included with the door panel (40458-402). Do not install an end panel in the position the Ice Cream stand is to be installed.
- Install the 9ft Swing Beam. Instructions are in 63076-303.
- Install the shutters from the Clubhouse Window Pack (63073-101) on the window panel above where the ice cream stand will mount. Do not install the flower box until after the position of the ice cream stand roof is determined.
- Install the Ice Cream Stand (63081-102) in the position shown.
- Install the flower box from the Clubhouse Window Pack (63073-101) on the window panel above the ice cream stand roof.
- Install the Ridgefield porch play walls (63071-101).
- Install Monkey Bars (63079-102) on the front of the tower. Mount one side directly to the post.
- Install the Fireman's Pole (AA917-603) in the position shown above.
- Lean the Access Ladder (SH946-102) in the position shown. Make sure the ladder is clear of the overhang of the ice cream stand roof. Secure the access ladder using the method shown in step 36 of the Ridgefield instructions.
- Fasten the Access Ladder Handles (AG942-400) to the Access Ladder.
- Install the slide mount and slide using the method shown in steps 38 and 39 of the Ridgefield instructions.
- Mount the Slide Handle (AG943-400) above the Super Wave Slide.
- Install the wall slats in the positions shown on the front page, using the methods from the Ridgefield instructions. Gaps must be narrower than 3-1/2" or wider than 9" to prevent potential head entrapment. Leave a space to access the fireman's pole.
- Mount hand grips to the entrance wall slats.
- Double-check all fasteners are secure and all recessed hardware is covered by hole caps.
