| 1 | 15166-400 | 10 ft. Super Wave Slide |
| 1 | AG943-400 | Slide Handle (Hdwre & Instr) |

The components of this gym can be combined with others to create different play sets. This is the best order of assembly to create this specific set. Read this sheet and all instructions included with the different parts before assembly. See the Instructions and Owner's Manual included in carton 63062-222 for important safety information.

- Start by assembling the Yorktown tower. Instructions are in carton 63062-222. Other instructions and hardware are in the cartons noted at left.
- Yorktown step 2. Omit the sandbox end on the end where the Skybox is to mount. It will be replaced when installing the play floors.
- Yorktown step 19. The 9ft Beam will be mounted in the position pictured above.
- After Yorktown step 22, before installing Panels: Find the posts adjacent the Skybox. On the outer face, drill 3/8" diameter holes through each post at 4", 9-1/2", 30-7/8", and 34" below the top of the post. Insert 5/16" weld nuts into the inner face of each hole. The Panels will capture the weld nuts.
- Yorktown step 24. Do not install the end wall panel adjacent to the Skybox tower.
- Yorktown step 28 thru 31. Do not install the panel frame, panel board, or gable filler adjacent to the Skybox tower.

- Wait to install the Access Ladder, Slide, and Wall Slats until after the rest of the play set is complete. The window guard is not needed.
- Skybox step 2. Omit the sandbox end under the gym. The floor transition from the Skybox Play Floor will be used instead.
- Skybox step 11. Use the front posts from The Skybox Roof (SJ926-810) in place of the post extensions.
- Skybox Step 17. On the side the Spiral Slide will mount, install only the wall slat closest to the main tower. The gap will be filled by the Spiral Slide.
- Ignore the special instructions regarding mounting with play floors in the Skybox instructions. A different method will be used.
- Install the Skybox Play Floor (SC904-800Q) and the Lexington Play Floor (SC910-800Q) using the method found in the Skybox Play Floor instructions on Page 3: "Install the Skybox Play Floor adjacent to a gym with a Play Floor." Some parts of the Williamsburg Play Floor will be cut to fit.
- Install the Skybox Panel (63066-101) to the end of the main tower below the Skybox platform.
- Install the Skybox Wood Roof (SJ926-810).
- Install the Gable Fans (SM964-402).
- Using a ladder, install the Dormers (SM963-402) in the positions shown on the first page. Ladder access may be obstructed by later installations.
- Install the 9ft Swing Beam. Instructions are in carton 63076-303.
- Install the Play Walls (SC909-800Q) across the back and along the swing side of the main tower, shown on page 1.
- Install the Rock Climbing Wall (AH-201Q) in the position shown.
- Install the Ice Cream Stand (63081-102) at the end of the Skybox.
- Mount the Spiral Slide to the Skybox in the position shown above using instructions included in carton 63033-102.
- Lean the ramp, access ladder and slide in the position shown shown in the picture on the preceding page. Check spacing.
- Fasten access brackets to the **inside** of the ladder rails. Secure the access ladder using the method shown in step 35 of the Yorktown instructions.
- Fasten the Access Ladder Handles (AG942-400) to the Access Ladder.
- Install the slide mount and slide using the method shown in steps 36 and 37 of the Yorktown instructions.
- Install the Ramp (SH922-800Q) in the position shown.
- Mount the Slide Handle (AG943-400) above the Super Wave Slide.
- Install wall slats in the positions shown on the front page, using the methods from the Yorktown instructions. Gaps must be narrower than 3-1/2" or wider than 9" to prevent potential head entrapment. Use entrance slats on either side of the Access Ladder.
- Mount one hand grip to each entrance wall slat.
- Double-check all fasteners are secure and all recessed hardware is covered by hole caps.
